

Remove Harmful Particulates From Indoor Air.

Installing a quality GeneralAire® HEPA Air Cleaner can reduce allergy and asthma symptoms, improve many chronic respiratory conditions and remove odors from your home's air.

Breathe Healthier

How The AC500 Works:

Air from your furnace passes through two separate filters inside the AC500: a pre-filter with carbon (removes odors) and a HEPA filter (removes 99.97% of airborne particulates).

Details inside or go to: www.generalfilters.com/AC500

Maintenance

Maintenance of your new GeneralAire® HEPA Air Cleaner is minimal. To ensure peak performance and reliable operation, simply replace your filter media: Pre-filter with carbon - every 6 months; HEPA filter - every two years. Go to www.generalfilters.com / support center / video library to view a video demonstrating how to change your filters.

Install An Air Cleaner In Your Home To:

Remove Odors And Smoke:

Whether from cooking, hobbies, pets, garbage, or smoking, the AC500 will help eliminate annoying odors! In addition, tobacco products contain as many as 4,000 different chemicals; 50 of which are known to be cancer-causing carcinogens. Reduce smoke levels with the AC500.

Reduce Allergy Symptoms:

Pollen is a major allergen that can cause miserable symptoms such as a runny nose, itchy eyes, sneezing and more. Skin flakes, urine and saliva from pets can all become airborne.

Breathe Healthier:

Find relief from hayfever, asthma, chronic cough, wheezing, sneezing, runy nose, sore throats and other sinus problems.

Why A Whole-House Unit?

- Treats Your Whole House 24 / 7 / 365
- Requires Minimal Maintenance
- Out of Site
- Quiet

HEPA - High Efficiency Particulate Arrestance

HEPA

- 99.7% efficient at removing particulates as small as 0.30 microns.
- Classified by the Occupational Safety & Health Admin. as the best in air cleaning.
- Captures the smallest particles that other filtration systems often miss.
- Used in computer rooms, medical and nuclear facilities, food, pharmaceutical and other industries requiring contamination control.

Child Safety Switch

- Found just inside door, automatically shuts system off if door is opened.

Door Hinges

- Holds door firmly in place while replacing filter media.
- The door can be lifted off its hinges and removed for maintenance purposes.

Easy Open Door

- Door latch "snaps" into place to create a secure seal.
- Unlatch and open to easily replace filter media.
- Simply slide old media out, and new media in! Takes seconds!
- Thick insulation on inside of door helps reduce noise and creates a tight seal.

Two Speed Motor Switch

- Found just inside door, allows you to select between normal filtration (200 CFM), or maximum filtration (300 CFM).

Inside the HEPA

Replacement Filter Media

- GF-HF500 RHF562 HEPA Filter
Replace Every 2 Years
- GF-HMK500 ARK564 Filter With Charcoal
Replace Annually
