GeneralAire App Connection Manual

Your GFX5 humidistat can be connected to a Mobile app, and you can control the humidistat using your cellular device. GFX5 WIFI/APP connection Manual will act as a guide to help you connect the Humidistat with the Application for iPhone and/or Android Mobile Device.

To download the Mobile App, Scan the barcode for iOS and Android

Go to your App store and in the search column, type GeneralAire Humidification and click download. After you have downloaded the App on your phone, click open and follow the following steps.

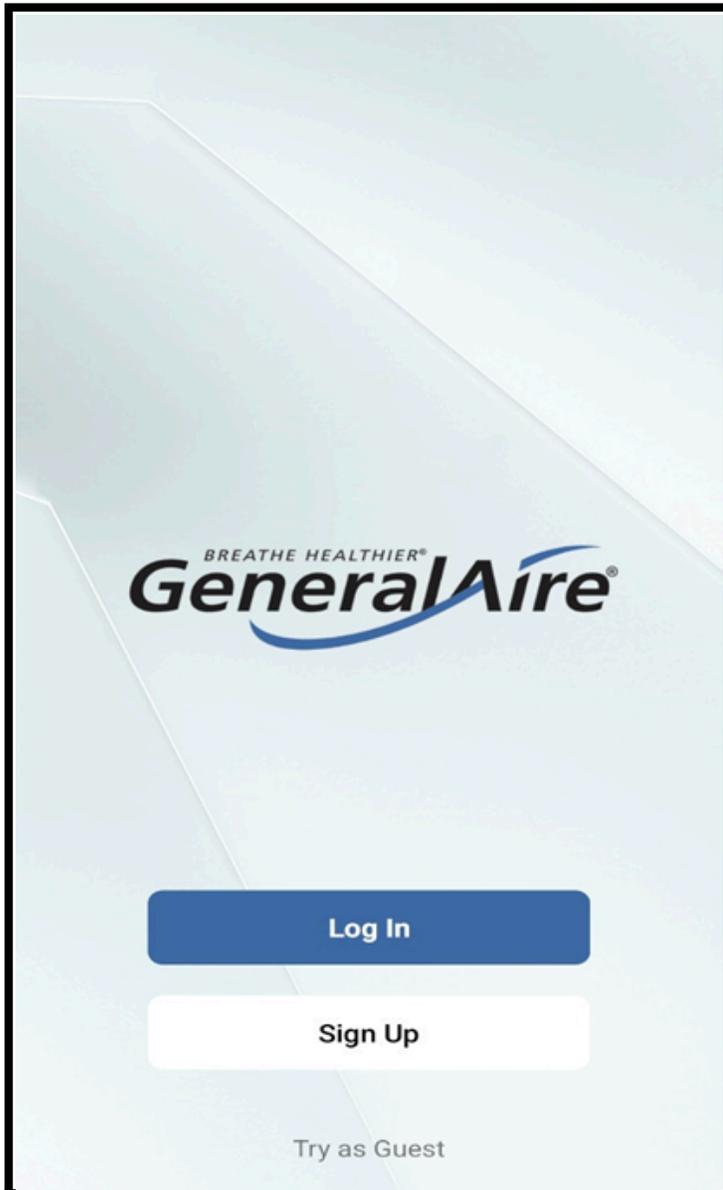

Go to your Play store and in the search column, type GeneralAire Humidification and click download. After you have downloaded the App on your phone, click open and follow the following steps.

IMPORTANT: WIFI connection must be 2.4 GHz. App Connection will not work otherwise.

Add Device

MyDevices   MyHumidity   App Options

GO TO APP

MYDEVICES HOME SCREEN

1 Click on Go to App for next window.
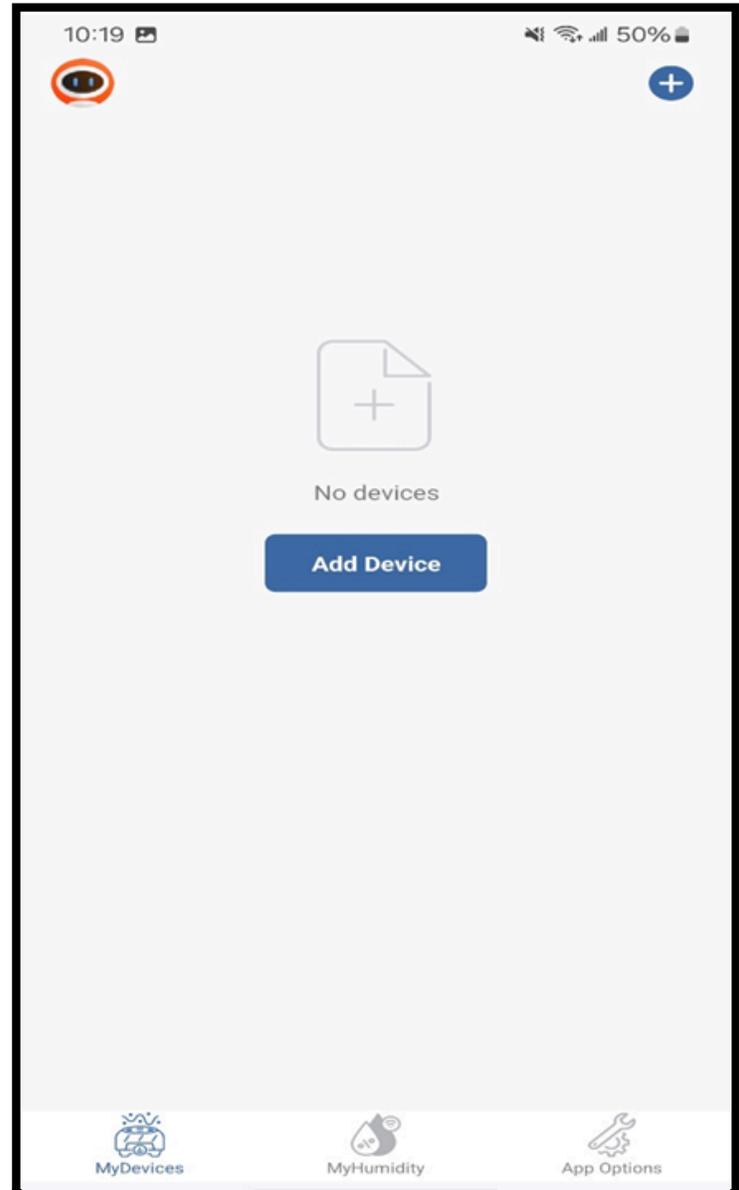

**1** MyDevices Home Screen, this screen will display all your devices once you have added them.

**2** Click on the 👁 to change/add profile photo and change nickname.

HOME MANAGEMENT
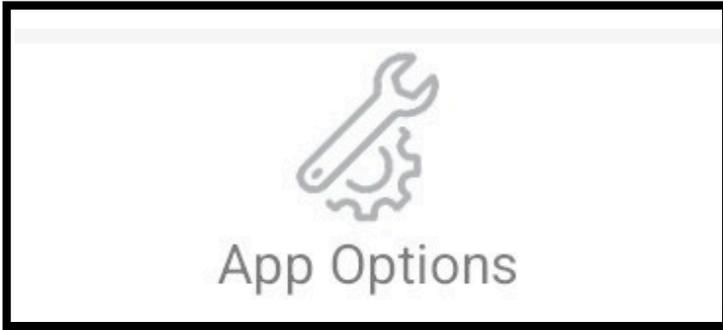

1 Click on App Options and go to Home Management Section.

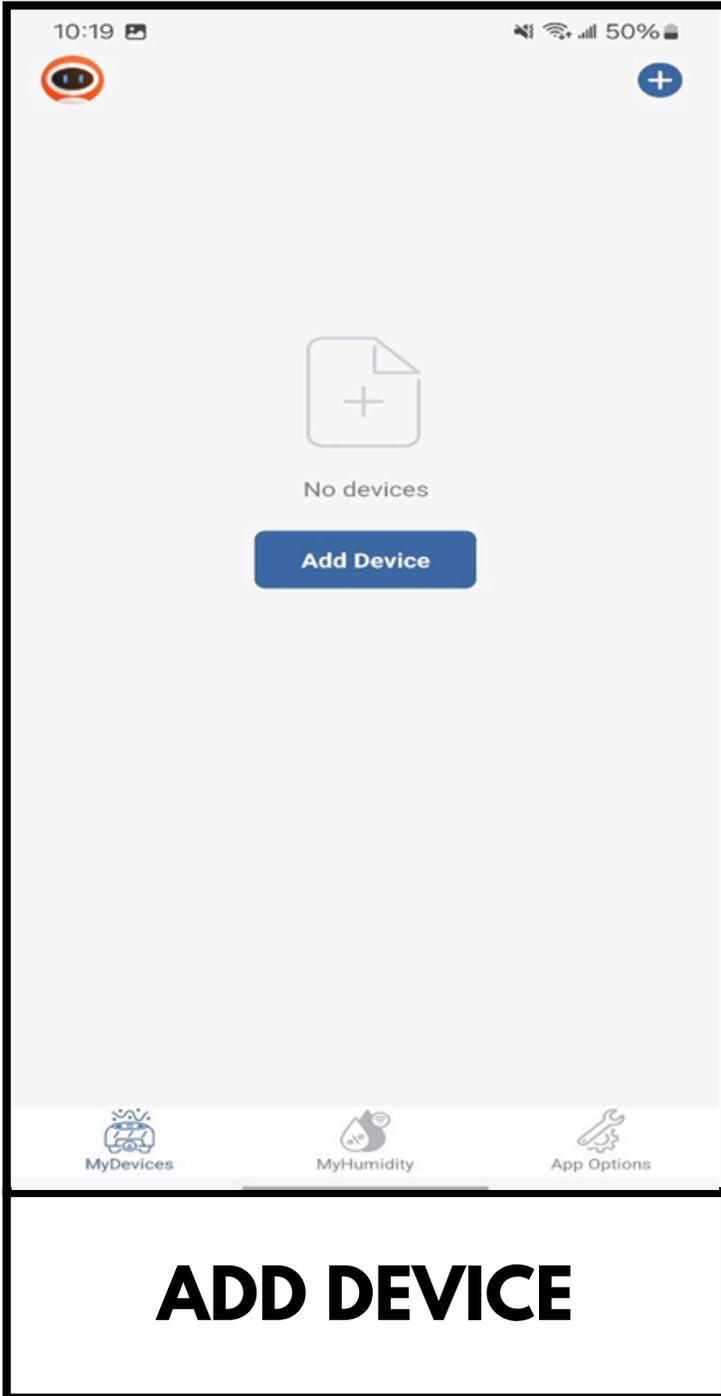

2 Click on My Home.

3 Enter your desired home name and set the location.

✦ Setting the location will help you get Outdoor Temperature Data from the App without connecting Outdoor Sensor. If the Outdoor Sensor is connected to Humidistat, it will act as Primary Source of Outdoor Temperature Measurement.

4 Click Save.

DEVICE SETUP

ADD DEVICE

1 Click the "+" or "Add Device" to add GFX5 Humidistat to your App. Once the device is added it will automatically show up when you open the app.

✦ To add a New Device again follow the same procedure mentioned above.

2 Please make sure the GFX5 is connected to the 24V supply and shows this Network Symbol:

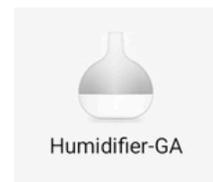

3 If the network symbol its not illuminated as above, press the ⏻ Button once to set device to OFF MODE.

Then, PRESS & HOLD ⏻ for 5 seconds to configure the connection.

You will see a blinking ☁ symbol followed by the 📶 symbol.

If the 📶 symbol starts BLINKING that means it is ready for pairing.

4 Press the icon below on the Mobile APP.

Humidifier-GA

Click on this Icon to proceed.

# DEVICE SETUP

CONNECT WIFI

SEARCHING FOR DEVICE

**1** Fill in your WIFI details and click Next.

✦ WIFI connection must be 2.4 GHz.

2 After this section, there will be 3 screens showing general information. Click on "Next" till you reach the Connecting Device screen.

1 The App will Automatically search for GFX5 Humidistat and add it to your Device list.
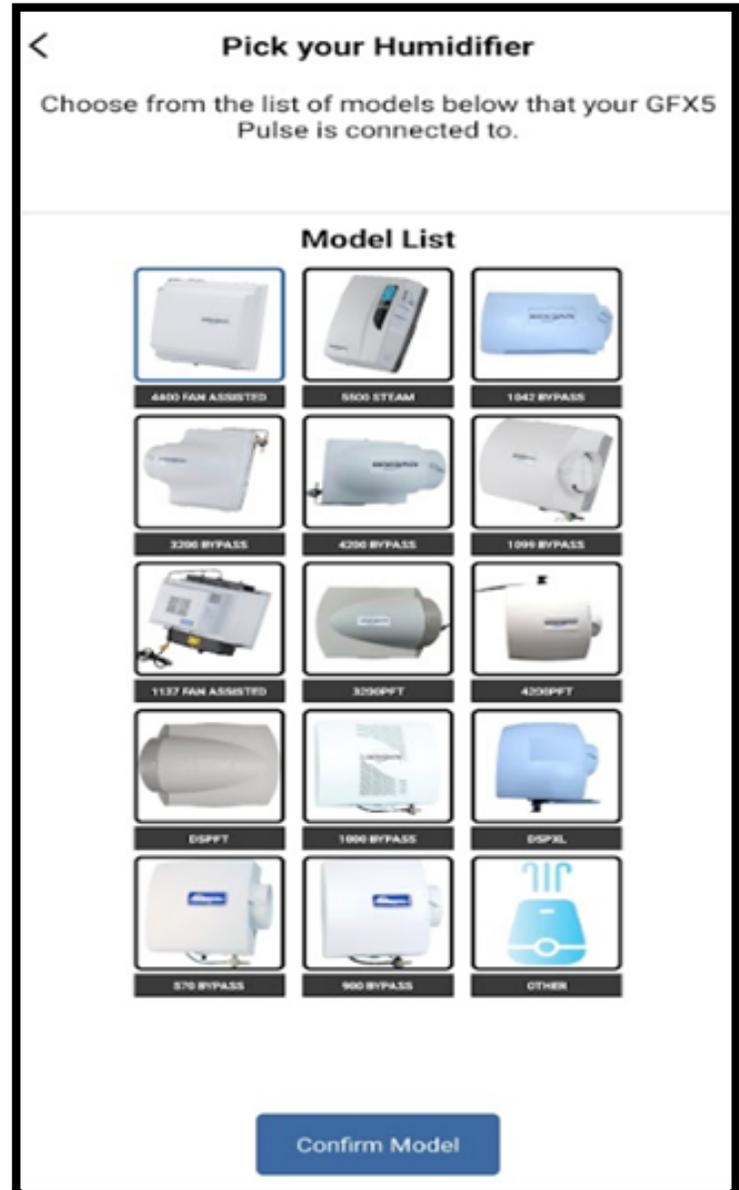

DEVICE SETUP

SUCCESSFUL CONNECTION

1. Click Done.

✦ Your Humidistat gets connected automatically.

PICK YOUR MODEL

1. Pick your Humidifier Model from the list. It will be highlighted with a blue border.

2. Click Confirm Model.

DEVICE SETUP

Humidifier-GA

Device Mode	Manual ➤
Country	Canada ➤
Temperature Unit	℉ ➤
Home Built-in	1966-1975 (6) ➤

For more information on Index Chart, please reference the Installation Manual.

Confirm Setup

ADD DEVICE

1 Enter Your GFX5 Humidistat Nickname.
(eg. Toronto Home GFX5 or Cottage GFX5 etc.)

✦ This is helpful because if you have multiple Humidistats connected, you will be able to pinpoint the correct one.

2 Select your Device mode, Country, and Temperature Unit.

**3** In the Home Built-In Section, please select appropriate Humidity Index Number.

Hum Index	Outdoor Temperature °F							
	-20	-10	0	10	20	30	40	50
1	0	5	10	15	20	25	30	35
2	3	8	13	18	23	28	33	38
3	6	11	16	21	26	31	36	41
4	9	14	19	24	29	34	39	44
5	12	17	22	27	32	37	42	47
6	15	20	25	30	35	40	45	50
7	18	23	28	33	38	43	48	53
8	21	26	31	36	41	46	51	56
9	24	29	34	39	44	49	54	59
10	27	32	37	42	47	52	57	62

Each Humidity Index Number represent the year of Home Built In and Insulation & Energy Efficiency.

For more details, please refer to the GFX5 Installation Manual.

4 Click Confirm Setup.

MYHUMIDITY NAVIGATION
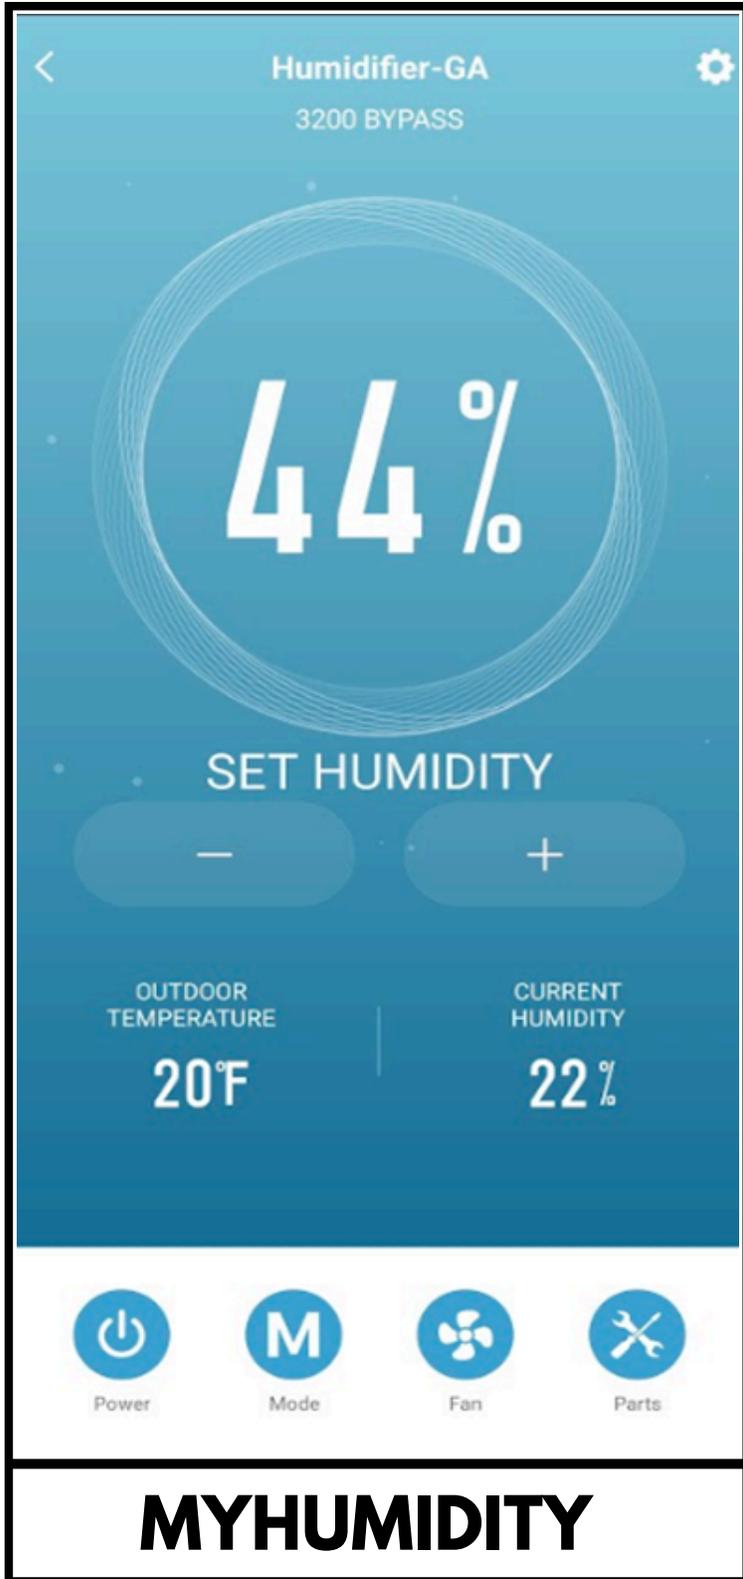

MYHUMIDITY

After you confirm the setup, this screen will pop up. This is the MyHumidity Control Panel for your GFX5. Your Nickname and Product Model are displayed at the top of the screen.

Power Button turns Humidifier ON/OFF.

Mode Button is used to change the operating modes to Manual or Auto.

If you change your mode to Auto, you cannot change your Humidity. It would follow the Humidity Index.

If the Blower Fan is not connected to your Humidistat, you can switch off this option.

The Parts Button takes us to our Official Parts website where you can purchase parts for Humidifier or Buy Vapor Pads for your system.

The Settings Icon on the top right takes you to the settings page where you can change options such as Country & Home Built In, among others.
